Recommended track size	Recommended sign size and maximum allowed quantities		
	H100 'A'	H150 'A'	H200 'A'
 L 600 mm 600*20*40 mm	6	4	3
 L 900 mm 900*20*40 mm	9	6	4
 L 1200 mm 1200*20*40 mm	12	8	6

Recommended sign sizes

Manual

1. Drill screw holes from the ceiling

2. Install suspension cable

3. Hook up the track to the suspension cable and put the power cable in place.

4. Connect to the driver.

5. Done.

Positioning magnets

Each aluminum track equipped with a metal strip inside the track so to attract the magnets to the signs, this design will make the signs won't move in the track or fall out in windy environment.

Put the power cable in place

You can move the power cable to any position of the track.

Convenient design

Just slide the signs into the track, it will be lighted up automatically.

Aim the signs at the track, and then push it into place.

This is the connection system between the track and the suspension cable.
You can change the length of the suspension cable easily.

Track Series

You can apply this series to many business occasions. Install the signs to the balcony, show window or counter ceiling will make your shop unique and attractive.
